

Instructions for Participants (coordinators should forward this to all participants):

1. All participants should have a working computer to participate in this workshop
2. Download the 'Canopy' Python distribution for your OS and architecture from here: <https://store.enthought.com/downloads> you may download it for either Python 2.x or 3.x, although 3.x is recommended.
3. Install 'Canopy' using following instructions: <http://docs.enthought.com/canopy/>
4. After installation, run the Canopy application once, to complete the setup
5. If you have downloaded Canopy with Python 3.x then install the following packages, pyqt.
 - a. Launch the package manager from canopy and install pyqt.
 - b. Or launch the canopy terminal (in tools menu) and on the terminal type:
`edm install pyqt`

If you have trouble in this step, please get this sorted out on the first day of the workshop.

6. Download the data files required for the workshop from this link:
<http://static.fossee.in/python/1-day-workshop/circulate.zip> (~500 KB)
7. During the workshop, you will follow the video lectures being played on-screen and type hands-on
8. You may ask questions / doubts during the scheduled Q&A sessions
9. Take part in quizzes after each session. The grades you receive on your certificates will be generated based on these quizzes

10. Video number 8 and 10 are additional topics, which the participants can view after the workshop, as per their interest
11. Keep this quick reference guide handy, during the workshop:
<http://static.fossee.in/python/1-day-workshop/quickref.pdf>
12. Visit <http://yaksh.fossee.in> and register one day prior to the workshop
- a. You may create a new user account (or)
 - b. You may use your Google Profile to create a new account
 - c. Once you have signed up and logged into the Yaksh interface please click on '*My Profile*'
 - d. On the '*My Profile*' page, make sure the below details are filled in accurately
 - i. First name
 - ii. Last name
 - iii. Email
 - iv. Institute
 - v. Department
 - vi. Roll number
 - e. In case the details are incorrect/missing, edit them by clicking on '*Edit Profile*'
